

Fill-finish precision in every dose from Algete, Spain

Efficiently delivering reliability and quality for your sterile injectable

With over 60 years of experience and employing more than 325 expert colleagues, Algete is a specialist site for complex sterile injectable solutions in low to medium volumes.

From late-stage clinical to delivery, Algete provides comprehensive solutions for your complex sterile injectable needs, including biologics, with expertise in aseptic fill-finish, lyophilization and cold chain distribution. Powered by Pfizer, Algete can handle your aseptic filling of proteins and small molecules requiring high customer touch, complex biologics, and gene therapy products.

Drug product manufacturing expertise

- Aseptic fill-finish complying with Annex 1
- Lyophilization
- Vials from 1 ml to 100 ml
- Yields optimization expertise
- Extensive testing experience, bioassays and protein-specific techniques

Expertise to handle the complex

- Aseptic filling of proteins and small molecules
- Clinical and commercial supply of complex biologics

Packaging and distribution capabilities

- Multi-component kits for patient self-administration
- In vitro diagnostic medical devices
- ATMPs and gene therapy packaging and distribution
- Cold chain qualification, handling and distribution

Time is life

A network of Pfizer scientists, regulatory experts, and analytical and quality control engineers who help reduce:

- Wait times for manufacturing suite access
- Process scale-up time
- End-to-end process cycle time
