

Delivering trusted quality and proven expertise for your sterile injectable at Puurs, Belgium

Excellence in every injection

As an awarding winning site, that is also Pfizer's largest manufacturing facility in Europe, our Puurs site supports the delivery of sterile injectable excellence to over 170 countries. With a proven track record in delivering base product continuity, along with seasonal and pandemic supply. Powered by Pfizer, Puurs helps ensure the safe, precise and reliable fill finish of your aseptic products with a proven approach to quality that keeps patients at the center, because time is life.

Expansive expertise in a variety of compounds

Capabilities to support you along your journey, from late stage clinical to commercial manufacturing to packaging and shipping. From secure facility design and specialized equipment to risk mitigation strategies, we help enable the efficient and compliant manufacturing of sensitive injectables, accelerating their pathway to the patients waiting.
