

Efficiently delivering sterile injectable excellence at Zagreb, Croatia

Flexible and transparent sterile injectable support you can rely on

Established in 2009, the Zagreb site boasts a highly technically capable team with a strong R&D background. With expertise in sterile liquid injectable biologics and pre-filled syringes (PFS), the number of colleagues at the facility grew from just 35 to over 500 today. Powered by Pfizer's extensive global network and proven technical expertise, the Zagreb specialist site helps ensure the lightspeed delivery of your sterile injectables to patients.

Multi-product manufacturing expertise

- Aseptic processing
- Pre-filled syringes (PFS)
- Microbial drug substance production
- Pegylation of therapeutic proteins
- pDNA manufacturing
- Packaging for vials and PFS
- Cold-chain handling and warehousing

Analytical capabilities

- Protein analytical testing
- Stability testing

Time is life

A network of Pfizer scientists, regulatory experts, and analytical and quality control engineers who help reduce:

- Wait times for manufacturing suite access
- Process scale-up time
- End-to-end process cycle time

Expertise to handle the complex

- EU Qualified Person release
- Supply for biologics drug substance and drug product manufacturing
- Secondary packaging for biosimilars and small molecules (cyto and non-cyto products)
- Specialized tech transfer expertise
