

Large molecule biologics
made with intelligent
collaboration

Wait. Seriously? Pfizer has lab-scale process development and process optimization capabilities for biologics?

We sure do. Collaborate with Pfizer CentreOne. And access our capabilities and teams integrated with broader Pfizer technical and development expertise.

Listening. Solving. Guiding.

Welcome to Pfizer CentreOne. We're a global CDMO embedded within Pfizer and a leading supplier of specialty APIs.

Working together with our customers, we combine our technical and commercial knowledge with open dialogue to solve challenges.

Intelligent collaboration with Pfizer CentreOne.

Pfizer has the experience of taking molecules from lab to patient. Over the years we've learned invaluable lessons in the development of biologics and share our project management experience to support our customers' drug strategies. Backed by Pfizer resources, we deliver technical expertise, global regulatory support and long-term supply.

More collaboration, better solutions.

For every customer, our approach means collaborative product technology transfers and commercial-scale manufacture of your large molecule biologic.

Capabilities

Equipped with the most advanced technologies, Pfizer CentreOne has rich experience in biologic products including:

- Proven history of production of therapeutic proteins and antibodies using expression in recombinant organisms including vaccine drug substance / intermediates, therapeutic proteins, monoclonal antibodies (mAb), antibody drug conjugates (ADCs) and mAb biosimilars
- Lab-scale process development / process optimization capabilities, integrated with broader Pfizer technical and development capabilities
- Demonstrated success in product technology transfer and commercial-scale manufacture
- Full analytical capability in-house for in-process controls (IPC), release testing, and drug substance stability testing
- Analytical methods transfer and verification, comparability and stability studies, release testing
- Pfizer Quality Systems; reliable lyophilization vial and syringe drug product capability
- Tech transfer acceleration capabilities at select Pfizer facilities
- Complete quality control services compliant with Ph.Eur., USP and JP
- Clinical, launch and commercial supply
- Cold chain
